

ABEL MORENO ACEVEDO

AI Product Engineer | Full-Stack & Generative AI Engineer

Medellín, Colombia | +57 313 392 9826 | moreno.abel@gmail.com | linkedin.com/in/abelmoreno

PROFESSIONAL SUMMARY

AI Product Engineer and Software Engineer with 14+ years of experience building SaaS products, backend platforms, web applications, and cloud infrastructure. Combines deep PHP/Laravel expertise with full-stack delivery, generative AI, product strategy, and business execution. Currently leads the end-to-end architecture and development of Bigmelo, turning professional knowledge into interactive digital experiences powered by text, voice, and visual AI.

CORE EXPERTISE

Generative AI & voice: OpenAI, contextual AI conversations, ElevenLabs, Runway, voice and avatar experiences

Backend & data: PHP 8.2, Laravel 12, REST APIs, PostgreSQL/pgVector, Redis, MySQL, MongoDB, Elasticsearch

Frontend: React, TypeScript, Vue.js, Astro, Vite

Cloud & delivery: AWS, Azure, Google Cloud, Docker, CloudFront, background jobs, automated testing, security, observability

Integrations: Instagram, TikTok, Meta/Facebook, YouTube, Wompi, Twilio, payments, and clinical laboratory services

PROFESSIONAL EXPERIENCE

AI Product Engineer | Bigmelo (Independent) | Jan 2026 - Present | Medellín, Colombia | Hybrid

- Lead product vision, solution architecture, and end-to-end technical execution for a SaaS platform that transforms professional knowledge and authorized voice into intelligent, interactive digital presences.
- Build backend services and APIs with PHP 8.2, Laravel 12, PostgreSQL/pgVector, and Redis for profiles, knowledge sources, conversations, products, subscriptions, credits, payments, and analytics.
- Develop the public experience and administration platform with React, TypeScript, Vite, Material UI, and Astro, including bilingual support and SEO.
- Integrate OpenAI, ElevenLabs, and Runway alongside Instagram, TikTok, Meta/Facebook, YouTube, WhatsApp, and Wompi; operate AWS infrastructure with Docker, S3, CloudFront, background processing, testing, security, and observability.

Senior PHP Developer | Nu Image Medical | Jul 2023 - Jun 2025 | Remote

- Delivered Laravel backend capabilities and targeted Vue.js frontend functionality for a healthcare-focused platform.
- Implemented third-party integrations for payments and clinical laboratory services, and contributed to OpenAI-powered product functionality.
- Built advanced reports, data transformations, and backend processes that supported operational workflows and decision-making.

Senior PHP Developer | BL3NDlabs | Nov 2021 - Jul 2023 | Remote

- Built Laravel APIs for web and mobile applications using test-driven development practices.
- Integrated payment solutions, Twilio, and specialized services for veterinary clinics.
- Delivered and deployed scalable services on Microsoft Azure.

Senior Full-Stack Developer | Teravision Technologies | Mar 2021 - Nov 2021 | Colombia / Remote

- Developed Laravel APIs for BL3NDlabs products and integrated them with web and mobile applications.
- Collaborated across backend and full-stack delivery in a distributed client team

Senior Software Developer | SproutLoud Media Networks | Jan 2019 - Mar 2021 | Medellín, Colombia

- Maintained PHP and Zend Framework 2 applications and delivered new Laravel and Vue.js services.
- Contributed to the transition toward microservices and built event-driven messaging capabilities with Apache Kafka, MongoDB, and PostgreSQL.

IT Professional -> Development Coordinator | World Food Programme, United Nations | Jun 2014 - Feb 2018 | Bogotá, Colombia

- Defined software architecture, engineering workflows, and cloud deployment practices while coordinating and contributing to delivery teams.
- Developed Nutrifami and information-collection tools supporting nutrition education and programme operations.
- Led integration, business intelligence, and data-processing work in close collaboration with operational teams.

SELECTED EARLIER EXPERIENCE

- Business Intelligence Engineer | Universidad Distrital Francisco José de Caldas | Apr 2017 - Nov 2018
- Web Developer Contractor | Parques Nacionales Naturales de Colombia | Apr 2017 - Dec 2017
- CTO | SquadrApp | May 2013 - Jun 2014
- Technology Engineer | Blulogistics | Jun 2012 - May 2013

AWARDS & RECOGNITION

- Special Innovation Award, WFP Innovation Accelerator (2016) - Recognized in Rome for Nutrifami, a nutrition education mobile app developed for WFP Colombia.
- Colombia en Línea Awards nominee (2014) - Best Mobile App category for Whooptag, a self-developed mobile application.

EDUCATION

Systems Engineering | Universidad Distrital Francisco José de Caldas | Bogotá, Colombia | Completed Dec 2011
